Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. The claims 1-26 are pending in the instant office action.

Restriction

2. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions, which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 1-15, drawn to bacterial culture comprising mutant strain of *P. fluorescens* producing alginate.

Group II, claims 16-23, drawn to method of production of mutant strain of *P. fluorescens* producing alginate of claim I.

Group III. Claims 24-25, drawn to use of bacterial culture comprising mutant strain of *P. fluorescens* for the production of alginate.

Group IV. Claim 26, drawn to drawn to use of alginate in the production of food, drug, etc.

3. The inventions listed as Groups I-VI do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

Groups I, and groups II-IV do not share their technical feature because one Group involve product, bacteria, other Groups involve the method steps. Thus, while the products of

Art Unit: 1652

Groups I is affected by the method of group II, product of group I can be used in other methods having other technical features (such as protein preparation). Groups II-IV do not share same technical feature because they involve different method steps, use different products and produce different outcomes.

Furthermore, the technical feature linking group I-IV appears to be that they all relate to mutant strain of *P. fluorescens* producing alginate of group I. The mutant strain of *P. fluorescens* producing alginate group I does not constitute a "special technical feature" as defined by PCT Rule 13.2, because it does not claim a feature which defines a contribution over the prior art as mutant strain of *P. fluorescens* producing alginate is taught by Huisman et al. (US 2004/0014197 A1).

4. In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement is traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
